

## SIENA MONIZ, INTERIOR ARCHITECTURE & DESIGN 2025

Herança Boutique Hotel (Heritage) and Ouro do Mar Marisqueira (“Gold of the Sea” Seafood Restaurant) are the result of the adaptive reuse of Quinta do Relógio, a 1616 square meter (17,393 sq ft) historic royal estate located in Paço de Arcos, Portugal, just 16 kilometers from Lisbon. The hotel and restaurant are conceptually rooted in the art of Portuguese filigree, Filigrana, and the symbolism of Gold of the Sea.

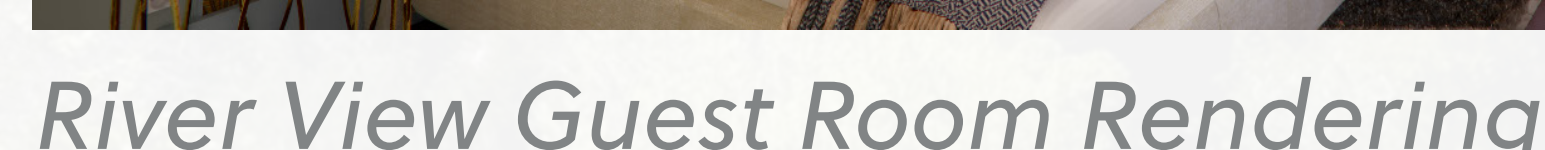

*Commissioned in 1860 by Viscount Bessone, the estate was designed by Italian architect Giuseppe Cinatti di Siena in a neoclassical style. Once a royal summer retreat, its legacy remains woven into the fabric of Paco de Arcos.*

This project aims to revive the beauty of a forgotten palace through hospitality design. The goal was to maintain the existing character of the palace while also incorporating contemporary elements for today's travelers. The hotel and restaurant create a space designed for travelers seeking an intimate, authentic experience rooted in elements inspired by Portuguese heritage.

The design prioritizes storytelling through spatial flow inspired by the movement of filigree, creating a refined guest experience rooted in history. Each focus space tells a story of heritage, intimacy, and luxury, blending styles of the past with styles of the present.
